## Professional Summary

---

With over 20 years of experience in IT, I specialize in designing and delivering custom solutions that meet clients' business goals, from initial assessment to final delivery. I focus on understanding client needs, solving their biggest pain points, and making their operations more efficient. As a professional fluent in five languages, I effectively bridge communication gaps and collaborate seamlessly with clients and stakeholders worldwide. I am committed to client success; I also constantly work on improving my skills and helping my organization stay ahead in the fast-changing tech field.

## Work Experience

---

### Technical Consultant / Back-end Software Developer

RWS Group / Montréal, Canada / 2019 - Present

- Provide consulting services for both cloud-based (SaaS) and traditional on-premises server systems, including translation and content management platforms.
- Provide integration services connecting various third-party management systems (e.g., CMS, CRM, Marketing Automation) to core client systems using specialized connectors.
- Design and develop custom solutions to extend or add features to clients' platforms, utilizing tools like REST APIs, SDKs, and custom add-ons.
- Manage system installation and configuration for on-premises deployments, including database migration, server management (e.g., cloud platforms and MS servers), and general infrastructure services.
- Deliver comprehensive user training and provide reliable post-sales technical support.
- Actively participate in the pre-sales process, including technical scoping and requirement gathering for prospective projects.

### Senior Technical Support Engineer

SDL International / Montréal, Canada / 2017 - 2019

- Provided expert technical support for client's core translation and content management platforms (including cloud-based and server-based systems).
- Guided clients in adopting best practices for optimized language processing.
- Designed and developed custom user interfaces and forms to enhance functionality for client platforms.
- Performed code maintenance and bug fixing for essential system components, including data processing filters and the application user interface.
- Managed system installation, server configuration, and database migration services for both on-premises and hosted environments.
- Conducted in-depth troubleshooting across various infrastructure layers, including database integrity, web server operations, network connectivity, and general server health.

### Senior Software Developer

SDL International / Montréal, Canada / 2015 - 2017

- Designed and developed custom solutions for core translation management platforms, including workflow steps, automated task schedulers, data parsing utilities, and tailored reporting tools.
- Collaborated on a terminology synchronization project, utilizing system tools and internal frameworks to ensure consistency across systems.
- Contributed to an integration project that connected an internal Content Management System (CMS) with the translation platform using established web protocols.
- Provided specialized technical support for desktop and server-based translation systems.

## **Senior Software Developer**

TRSB Inc. / Montréal, Canada / 2012 - 2015

- Collaborated on multiple integration projects to enhance platform capabilities, developing automation tools for project setup, quality assurance (QA) checkers, tag correction utilities, post-editing analysis, and customized workflow systems.
- Contributed significantly to the development of the Online Translation Editor interface, focusing on interactive and user-friendly web design.
- Led the Machine Translation (MT) initiative, successfully integrating the MT engine into the core production workflow to boost efficiency.
- Integrated office productivity automation tools into the production workflow using scripting to streamline document processing.
- Served as Technical Lead on various complex localization projects spanning multiple formats, including web content, multimedia assets, and desktop publishing materials.

## **Software Developer**

Lionbridge Canada Inc. / Montréal, Canada / 2007 - 2012

- Led the development of multiple specialized tools, including utilities for content extraction, content re-importation, automated quality assurance (QA) checking, and spelling verification.
- Contributed to the development of the Vendor Registration Portal, focusing on secure data handling and database interaction.
- Participated in the Translation Project Dashboard initiative, integrating external payment and data services to display real-time project metrics.
- Served as the Technical Lead for various automation initiatives across the organization, streamlining internal processes.

## **Web Developer**

Baracci Solutions / Laval, Canada / 2006 - 2007

- Designed and developed front-end web interfaces, emphasizing user-friendly layout, visual appeal, and interactive features to create engaging digital experiences.
- Contributed to the underlying functionality and data structure of web applications, focusing on delivering a seamless and fast user experience.
- Executed graphic and multimedia design projects, creating visually pleasing assets, animations, and video content that aligned with brand aesthetics.
- Performed sound editing and optimization for multimedia assets, ensuring high-quality audio presentation across all content.

## **Web Developer / Graphic Designer**

TexFx - Groupe Design Mode / Ste Adèle, Canada / 2004 – 2005

- Performed expert fine-art reproduction and image digitization, ensuring absolute color accuracy and preservation of original detail via meticulous color calibration and advanced manipulation techniques.
- Conceived and created compelling graphic design for diverse advertising and promotional materials (including flyers, brochures, newsletters, and large-format posters), driving high-impact visual communication.

## **Web Developer / Graphic Designer**

Milton Funwear Inc. / Montréal, Canada / 2002 - 2004

- Designed and executed front-end web experiences, emphasizing visual aesthetics, user-friendliness, and interactive design.
- Contributed to the underlying structure and functionality of web applications to ensure seamless content delivery and user interaction.
- Conceived and created compelling graphic design for diverse advertising and promotional materials, including flyers, brochures, newsletters, and posters.

## Sales Engineer

CoHand HVAC Equipment Inc. / São Paulo, Brazil / 1999 – 2000

- Drove sales and expanded market reach as a Sales Representative across the South American region.
- Managed and executed the integration of complex HVAC (Heating, Ventilation, and Air Conditioning) control systems for commercial projects.
- Developed detailed technical documentation and schematics using industry-standard drafting tools to support project planning and implementation.

## Electrical Engineer

Alcatel Corporation / São Paulo, Brazil / 1997 – 1999

- Executed complex industrial automation system integration projects. This involved defining system architectures and ensuring seamless interoperability between diverse hardware and software components.
- Developed and implemented industrial Human-Machine Interface (HMI) software and established robust system communication protocols.
- Engineered and integrated automation and control systems using Programmable Logic Controllers (PLCs) for reliable operational management.

## Certification

---

Microsoft Certification (MCTS) ID: 8533927

.NET Framework 3.5, Windows® Forms Applications

## Education

---

### Data Science

John Abbott College / Montréal, Canada / 2020

### Big Data Management

John Abbott College / Montréal, Canada / 2019

### Web Application with Node.js and Angular

Collège Maisonneuve / Montréal, Canada / 2018

### Microsoft SharePoint 2016 Administration

Collège Maisonneuve / Montréal, Canada / 2017

### Microsoft ASP.Net with MVC and Web API

Dawson College/ Montréal, Canada / 2017

### Bachelor's degree in electrical engineering with specialization in Automation and Control

University de São Paulo / São Paulo, Brazil / 1989 - 1994

## Computer Skills

---

**Programming:** C#, .Net Core, ASP.NET Core, HTML 5, CSS, JavaScript, ES6, Java, Python, PHP, SQL, Angular/React

**Graphic Design:** Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Adobe Acrobat, Adobe Captivate
